Solid Surfaces

high performance solid surface
staron.com.au

ABOUT Staron®

Staron® Solid Surfaces is manufactured from a safe natural mineral refined from bauxite and blended with pure acrylic resin to create a high performance solid surface. Staron® Solid Surfaces does not contain harmful silica. The surface is suitable not only for commercial projects, but for endless applications around the home including kitchens, bathrooms and laundries.

Flexible in Design

With a range of over 90 colours to select from, Staron® offers an extensive range of solid surface in Australia. Staron® is both aesthetically and functionally pleasing. It can be thermoformed into flowing curves or sculpted into any shape imaginable. The flexibility of Staron® extends to limitless edge profiles, drop down edges, splashbacks and tile coves. Selected Staron® colours are also translucent and can be backlit to bring your design to life.

Hygienic, Durable & Repairable

The non-porous nature of Staron® provides a surface that no stain can penetrate - providing a durable surface that is hygienic and easy to clean. Staron® is also repairable and renewable. Even after years of use it can simply be sanded, thus restored back to its original condition. Staron® does not have any finishing polishes or sealers applied, it is the same solid material throughout its thickness. Because of this nature, every wipe to the material will rejuvenate the surface.

Monolithic

Staron® creates long and wide continuing surfaces with no open or conspicuous joins. With a collection of integrated Staron® kitchen sinks and vanity bowls – a smooth benchtop space can be created. No dirt trapping joins or crevices to clean, just one continuous surface that looks and performs like one piece.

10-Year Limited Warranty

Staron® is an affordable quality solid surface backed by a 10-Year Warranty for peace of mind. Staron® is a homogeneous and solid mineral-filled acrylic polymer material so that it is easy and convenient to care for and maintain. Simple routine maintenance is required to keep it looking new and fresh. For full warranty details, and to register your warranty visit: staron.com.au

ABOUT Austaron Surfaces

Austaron Surfaces are the proud distributors of Staron® Solid Surfaces. The business was established over fifteen years ago, with an aim to provide quality surfaces and finishes to the Australian market. Our product range is trusted by designers, architects, retailers, builders and also extends to consumers. Our products are used across many industry segments including but not limited to: retail, healthcare, entertainment, food service, office fit-outs, residential and many other commercial projects. With an industry experienced sales team based in all states of the country, the business works together with project managers and designers on projects from the specification stage, all the way through to delivery of the product. For more information on Austaron Surfaces and our product portfolio, visit: austaron.com.au

kitchen innovation meets design

Project: Kitchen design, Sydney. **Designer:** Minosa. **Staron® colour & application:** Bright White, benchtops. **Photography:** Nicole England.

The design criteria for this kitchen design was that it had to be rich, warm and quality driven. The stone, which is clad to the front of the island unit, was sourced for its natural beauty and lovely veins. When considering the material to be used for the most used surface in the kitchen - the benchtop, thought had to be given to find a surface solution that is beautiful, bright and easy to live with. Staron® Solid Surfaces in colour Bright White was chosen for its low maintenance qualities, smooth nature and ability to assist in light reflection. This innovative kitchen design also allowed the designer to incorporate an offset breakfast bar for the kids to congregate and socialise around, it was an added bonus. Staron® has a renewable, stain resistant surface with no open joins, so it was also carried through to the laundry benchtop. The bench space doubled in this area and the designer was also able to install a two way linen cabinet, which is pure design brilliance. Accessories are black and appealing in contrast to the crisp white benchtops; they also compliment and tie in with the selected designer lighting. It oozes a refined modernism that one aspires to reach in their life.

glowing glamour

Project: Kitchen design, Adelaide. **Designer:** Tania Kloester, TK Design.
Staron® colour & application: Supreme Ocean View, benchtops and backlit table top.

This new kitchen was created in a substantial home extension. The materials and colours had to be considered carefully to create a beautiful work zone that filled the large open space while providing a functional layout. Three islands were designed and two rear wall runs, featuring Staron® Solid Surface benchtops throughout. The central hub consists of a circular table with a Staron® table top that is back lit to create a glowing feature. An oversized pendant light above the table adds drama and glamour. The adjoining island units snugly surround the table, creating more focus on the central feature with their curved form. The cooktop and cleaning zones are concealed behind joinery, drawing the eye to the table area, and providing a focal point within the large space. Being big entertainers, the clients required a bench top that would be durable and create impact, Staron® Solid Surfaces was the perfect surface solution for this project, as it was able to provide large islands tops with no open joints. The illuminative nature of Staron® also enhances the central feature. The colour 'Ocean View' was selected for its texture and warm tones to complement the striking timber veneer and copper accents.

intelligent design options

integrated sinks

When a Staron® sink is joined to a Staron® benchtop, it looks and performs as one continuous piece of surface, creating a one-wipe flow from the benchtop into the sink. Staron® has a selection of standard sink designs, or create something custom to suit your needs. For the entire range of solid surface sinks, see pages 42-43.

clad to door and drawer fronts

Create an integrated look by cladding Staron® to cabinetry. With the easy maintenance and durability of Staron®, your cabinets will be a beautiful feature and create easy living.

benchtop, tile cove and splashback

Extend your Staron® benchtop to include the sink and splashback for an integrated and monolithic finish. The surface will continue with no open joints. A tile cove offers a smooth and clean finish at the back of your benchtop, where the benchtop meets the splashback. A 10mm tile cove will eliminate dirt and germ crevices and allow a smooth join to your splashback.

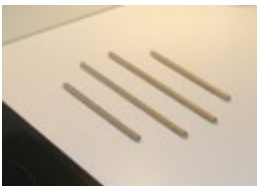

endless edge profile options

Staron® offers the design flexibility and freedom to create your own custom and personalised edge profile. Ask your Certified Staron® Fabricator about the endless edge profile options available. Most benchtops in Staron® are a standard 38mm thick, however, the flexibility of Staron® means that any benchtop thickness can be created with minimal effort, while staying within your budget. Many other materials only offer a 20mm standard thickness.

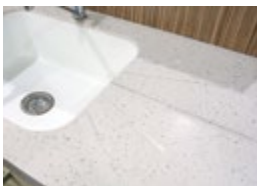

Other Staron® design options:

Waterfall Edges

Integrated Heat Rods

Integrated Drainer

smooth bathroom surfaces

Project: Bathroom design, Adelaide. **Designer:** Fresh Kitchens. **Staron® colour & application:** Supreme Dawn benchtop and Bright White A3181 vanity bowl.

Create a warm and tranquil bathroom environment that will transform into a sanctuary. Use Staron® to create formed vanity sinks, vanity tops, walls, floors, shelving and bath tubs. With a smooth finish, Staron® provides a continuous surface with no open joins. Use one of the standard solid surface vanity bowls - or push the boundaries of design by creating a custom vanity space. Use long drop down edges and curves for a dramatic elegance that is unique in design and function.

beautiful surfaces, easy maintenance

Staron® is kinder on dishes and quieter when it comes to impact of glasses, crockery and cutlery. Due to its durability, the material will maintain its look for many years. When most other materials need replacing, Staron® continues to perform. Staron® can be used in endless residential and commercial environments. Extend Staron® past the benchtop into the splashback for an integrated finish. Other design options such as integrated heat rods, drainers and a large selection of edge profiles are also available. The possibilities are endless, and the ideas are only limited by your creativity.

timeless elegance

Project: Bathroom design, Tasmania. **Designer:** Drew Edwards, BYA Architects. **Joinery & Fabrication:** Corey Schrapel, Precision Renovations & Maintenance. **Staron® colour & application:** Onyx, bathroom wall cladding. **Photography:** Loic Le Guilly.

For a stunning architecturally designed space, a special product was required to turn this ensuite of this award winning home into an amazing feature. The result was delivered using Staron® in colour Onyx. Staron® was used to create a dado half wall with stainless steel surrounds. The design complemented the rammed earth walls of the home seamlessly, creating a high end finish sought by the home owners. The non-porous nature of Staron® provided a hygienic and durable option for the wet area. The design versatility of the product allowed the dado style wall to go from imagination to reality. The aesthetically pleasing nature of Staron® created a timeless piece of luxury with warmth and a tranquil feel. This project has been awarded the HIA Tasmanian Bathroom of the Year.

mould and mildew resistant surfaces

Use Staron® to create a thermoformed bath tub that will feature as an art-like structure in the bathroom. Continue Staron® to the bath surrounds for an integrated look that is easy to maintain. Combined with a Staron® vanity top, this high use wet area will be totally renewable. With a large selection of colours to choose from, Staron® will suit any taste. Non-porous in nature, no stain can penetrate into the material - providing a functional and aesthetically pleasing surface.

Imagine a bathroom with no grout lines! Staron® wall panelling provides a smooth and monolithic finish with no dirt-trapping crevices, no mould and no mildew. Staron® prevents the growth of bacteria or mould making cleaning easy, along with healthy living and creative design possibilities.

Staron® colour: Supreme Urban Grey.

wall cladding, shower walls and floors

Use Staron® to create monolithic shower walls, shower floors and wall cladding to make wet areas that have no grout, no mildew and no mould, just easy living!

curve it

The thermoformability of Staron® means that you can curve it into any shape imaginable!

bath tubs and surrounds

Wrap your bath tub or create a bath tub entirely from Staron®. With a warm touch and easy maintenance, it is the perfect bathroom surface solution.

integrated toilet cistern

Create an integrated area that is easy to keep clean and visually appealing.

vanity benchtops

Create monolithic Staron® benchtops that flow effortlessly onto Staron® walls for a clean and integrated look.

vanity basins and sinks

With a range of standard Staron® vanity basins, create a vanity top with no open joins or dirt trapping crevices. For the entire range of solid surface sinks and vanity basins, see pages 42-43.

form and function

outdoor living & other rooms of the home

Project: Kitchen & outdoor, Brisbane. **Designer:** Kim Duffin, Sublime Architectural Interiors. **Staron® colour & application:** Featured on kitchen benchtops, splashbacks and extends to the alfresco area table top and BBQ surrounds in colour Aspen Glacier. Clad to cabinetry in colour Quasar White.

The durable and non-porous nature of Staron® makes it the perfect solution for any room in the home, including alfresco areas. Selected Staron® colours have a 10 year limited warranty for outdoor applications [contact your Austaron representative for a list of the selected colours], so you can create beautiful surfaces from the inside and continue it to the outdoors. Staron® can also be utilised in the laundry as durable and seamless work tops. It can be used as furniture including dining tables, side and coffee tables, even seating. The renewable nature of Staron® also means that the surface can easily be buffed after years of use - extending the life of your application and ensuring it always looks good, even in a busy family home. The use of Staron® for furniture allows you to extend into the home office to create integrated desks. Make interesting designs by routing or carving into the surface, inlay multiple colours of Staron®, or extend Staron® to interesting table bases for an integrated look. Create chairs, cabinets, storage solutions, shelving and unlimited other applications.

food service, tables & furniture

Project: Chicken Hub, Adelaide. **Designer:** Tania Kloester, TK Design.
Staron® colour & application: Mosaic Dalmatian, Metallic Sleeksilver, table tops and seats.

Chicken Hub is a busy takeaway food outlet in Adelaide's Aberfoyle Park, offering food from the heart. Tania Kloester of TK Design created a space to accommodate both dine in and takeaway customers. A dining hub was created, using Staron® Mosaic Dalmatian for seating, and Metallic Sleeksilver for the tabletops. The clients specified that they wanted to use a product that was easy to clean, had no open joins, and offered an impressive feature to the space. Having replaced the old upholstered seating several times, the fast-food outlet required a surface that was repairable and durable. The properties of Staron® Solid Surfaces have allowed for the banquette seat to be ergonomically formed with seamless built-in table areas to the waiting area. The colour and texture of Staron® Mosaic Dalmatian feels smooth, and offers a unique pattern with a soft forgiving nature. Staron® Metallic Sleeksilver was used in the fabrication of the table tops; complementing the seating and surrounding area perfectly. The non-porous properties offer a hygienic, easy-to-clean application, which looks and feels inviting. Additionally, Staron® meets NSF51 National Sanitation Foundation Accreditation for safe food hygiene, which means it is a practical surface solution for commercial kitchens. Staron® can be created into long and wrapping counters, serving areas, food hall tables, wall cladding, preparation areas, seating, signage and more. Staron® also offers a wide range of colours that can suit any environment or franchise colour scheme.

offices

Project: McCullough Robertson, Brisbane. **Designer:** Jacqui Esdaile, Leigh Devine & Kate Tuffley, Valmont. **Staron® colour & application:** Bright white, clad to reception desk. **Photography:** Toby Scott.

This extensive new office fit-out needed to introduce a new open-plan approach, develop flexibility, adaptivity, collaboration, community and the notion of working together. To implement these design principles, the concepts of geometry was woven throughout the space aesthetically, in form, finish and functionality. These concepts take centre stage in the reception area, where Staron® was curved via thermoforming, and clad to the reception counter top, sides and front. The Staron® surface was also 'imprinted' with flush mounted tessellated marble mosaic tiles on one end of the unit. This reflects the core concepts of flexibility and 'working together'. The counter itself works as a landing point for visitors to the space whilst also offering administration staff a comfortable and pleasing environment in which to conduct their daily duties. With a smooth finish and no open joints, Staron® fits the performance requirements of a busy reception counter and concierge point with a welcoming appeal. It offers a clean and hygienic surface to provide a clean workspace and avoid cross contamination, as it does not promote the growth of bacteria. Staron® can also be used to create desks, toilet partitions, bathroom vanities, table tops, wall panelling, kitchenettes, furniture and more.

Create integrated charging stations directly into Staron® Solid Surfaces using **Aircharge®** wireless charging solutions. For more information about **Aircharge®** visit:

<http://www.austaron.com.au/aircharge.html>

retail

Project: Sunglass Hut Flagship Store, Sydney. **Co-designed:** by Sunglass Hut and Tim Bennett, Luxottica. **Staron® colour & application:** Quasar White, wall cladding.

The demanding and high traffic environment of retail fit-outs needs a surface that is durable, hard wearing, renewable and non-porous. Staron® meets every criteria to create a project that will look like the day it was installed, for years to come. Inconspicuous joins make cleaning easy with no dirt trapping crevices, unachievable with many other materials. Located in the centre of the CBD retail area of Sydney, the Sunglass Hut Flagship store had to be unique and an elevated expression of the Sunglass Hut brand. It had to redefine the brand experience and be relevant to the specific location. The design of the retail fit-out also had to have a visual connection with the iconic and globally recognisable elements of Sydney: sun, beach and waves. The thermoformable nature of Staron® made it the perfect surface solution to create a design concept inspired by the loop of a wave. Long, monolithic curved walls were created with Staron® in colour Quasar White featuring a radius at both the top and bottom to represent the wave. The Staron® ‘waves’ display the sunglasses in an inviting and striking design for customers to see and try on the sunglasses.

bars, clubs & hotels

Project: Riley, a Crystalbrook Collection Resort, Cairns, Queensland, Australia. **Designer:** Tim Bentley, ThomsonAdsett. **Staron® colour & application:** Supreme™ Delphi clad to columns, reception surfaces and planter boxes. **Staron® fabricator:** FNQ Plastics.

This hotel is the first new luxury destination to be built in Cairns. The design criteria for this project was to mix beach themed interiors in a tropical esplanade location. The foyer of the hotel has been designed to reflect the beauty of the location without interrupting the direct views to the esplanade foreshore. Staron® cladding was selected for its superior finish and ability to mould monolithically into curved cladding around the existing columns. The elliptical shape is the key design element to the foyer - drawing the eye over the pool and out to the esplanade. Staron® Solid Surfaces in colour Supreme™ Delphi was curved through thermoforming and wrapped around the impressive columns from the floor up to the meet the high ceiling. The height of the columns creates an open, luxurious and welcoming feel. The hotel reception counters have also been clad entirely with thermoformed Staron® to emulate the curves of the columns. Due to the easy maintenance and durable nature, Staron® was the perfect surface solution for this high-traffic area. In addition, Staron® was also clad to the large planter boxes throughout the lobby area. Filled with vibrant green plants, the Staron® frames the greenery to further enhance a tropical feel to the space.

dental, healthcare & aged care

Project: Adelaide Women's and Children's Hospital, Adelaide. **Designer:** GHD, Adelaide. **Staron® colour & application:** Metallic Yukon, wall cladding.

Healing begins with a patient's environment. Staron® offers a warm, soft and soothing feel to the skin. It does not feel 'cold' like many other surfaces do. Staron® also offers a hygienic finish that abolishes cross contamination, perfect for dental surgeries, hospitals and aged care facilities. When GHD were searching for a surface to clad on the walls of the nurses station in the Starlight Express Room, they searched for a material that lends itself to hospital environments. The material had to be visually stimulating while still meeting the stringent hospital standards in relation to cleaning and hygiene. Staron® Solid Surfaces met this criteria due to its non-porous nature that abolishes cross contamination. This area of the hospital is a welcome retreat for the seriously ill children/teenagers and their families giving them an environment away from the rigours of hospital life, so the materials selected had to adhere with the concept of an internal garden that aims at bringing the outdoor environment indoors to create a hub of fun and distraction. The Staron® surface provides a warm and inviting surface to touch, with the soft curves also creating an organic feel. Staron® additionally prevents the growth of mould or mildew, providing a clean surface solution. This also means it can be used in and around showers and bath tubs by creating curves for easy access. The seamless nature of Staron® adds heightened hygiene and eliminates dirt trapping crevices, that is essential in this type of industry. Staron® also extends itself to fully integrated dentistry bowls, baby baths or sinks and vanities - with no open joins, just one continuous surface. Create monolithic wall surfaces, toilet partitions, food preparation kitchenettes and more.

Solid Surfaces More Innovation, More Integration

education

Project: University of Queensland, Brisbane. **Designer:** Luke Pendergast, Conrad Gargett. **Staron® colour & application:** Aspen Glacier, laboratory classroom benchtops. **Photography:** Christopher Frederick Jones.

Staron® is Greenguard® Certified to support good indoor air quality and Greenguard® Gold Certified as a low-emitting interior building material that is safe to be used in educational environments. Therefore, Staron® is the perfect surface solution for unlimited applications in the education industry, from daycare centres, primary schools, high schools, universities and other educational institutes. The 'Teaching Space Project' which forms a part of the University of Queensland's Great Court Complex delivers a High-tech PC2 undergraduate interactive wet laboratory facility. The space has been designed to fill identified key gaps in the school's upper-level undergraduate teaching program and is located within the heritage listed Goddard Building. The facility enables the ability to instruct students in modern biological techniques requiring a high level of containment, and the capacity to deliver small-group tutorial-based instruction within the context of computer-based learning. Staron® Solid Surfaces in colour Aspen Glacier has been used for the laboratory benchtops due to its chemical resistance, visual appearance and design flexibility. The durability, non-porosity and smooth nature of the product also made it an ideal surface for a laboratory application. The suitability of Staron® in an educational institute also extends to public restrooms. The renewable and non-porous nature of Staron® does not promote the growth of mould, mildew or bacteria. Staron® also provides a non-absorbent nature to odours to improve hygiene. It can also be sanded back to its original condition, which extinguishes graffiti. Staron® can be used as toilet partitions and benchtops with the option of integrated Staron® sinks or vanity bowls. Other applications possible also include but are not limited to wall cladding, integrated student desks, cafeteria tables and stools, server counters, kitchen benchtops and library counters.

leisure & lifestyle

Project: Buizen 52 cruising yacht, Sydney. **Designer:** Peter Lowe Design in collaboration with Anthony Starr Yacht Design. **Fabrication:** Buizen Yachts. **Staron® colour & application:** Pearl, galley benchtops.

The design brief for this super yacht was to create a fast, luxurious and innovative cruising yacht that achieved the perfect balance of form, function and performance. There was a desire for modern design and construction technology, and a need to deliver the traditional Buizen values of premium build quality, structural integrity, engineering excellence and sumptuous hand crafted artisanal finishes. When the search began for suitable surfaces for the galley and ensuite, the non-porous nature of Staron® Solid Surfaces made it the perfect surface solution. Staron® does not promote the growth of mould or mildew making it an ideal material for wet areas found in any marine application, such as the galley, outdoor tables, benches and panelling. Staron® in colour Pearl was used for the galley benchtops and ensuite/shower wall surfaces. The benchtop also features a tile cove in the back of the benchtop where it meets the glass splashback for easy cleaning, and an integrated bin to keep things tidy. The undermount sink means a 'one-wipe' flow exists from the benchtop straight into the sink with no dirt trapping crevices. Staron® perfectly matched the overall premium quality finish of the Buizen 52.

thermoforming

Project: Stuart Weitzman for Hermanns, Sydney. **Design concept:** by Fabio Novembre of Novembre Studio Architects. **Architect:** Victor Isobe of Zen International. **Shopfitter:** Australian Professional Shopfitters. **Staron® Fabricator:** Pallete Solid Surface **Staron® colour & application:** Bright White, curved service counter and ribbon design shelving.

Staron® Solid Surfaces has been used in the Stuart Weitzman for Hermanns fit-out in the exclusive Westfield Sydney. Staron® has been thermoformed to create curves, and formed into shelving that emulates the shapes of a flowing piece of ribbon. The design concept was first used in Stuart Weitzman stores throughout Europe, and has now been rolled out into Australian fit-outs. The Staron® surface begins at the door of the fitout and continues up, down and around the walls of the entire store. It curves and intertwines capturing the flowing effect of a long piece of ribbon. The curves also continue onto the service counter, keeping within theme. The smooth nature of Staron® Solid Surfaces also means that the surface continues around the entire store with no open joins, just one continuous piece of material. The shelving lines the walls of the store, as well as additional art-like pieces in the centre, showing off the high end merchandise. The non-porous nature of Staron® also ensures that it will look great for years to come in this high traffic retail installation.

illumination

Project: Spa **Staron® colour & application:** Bright White, routed and backlit.

The unique design properties of Staron® Solid Surfaces gives you the freedom to create something unique and special. The translucency of selected colours of Staron® means that you can backlight it to illuminate the entire surface. Bars, walls, sculptures, furniture or any other piece can be transformed and 'lit up' for maximum effect. Staron® also has the capacity to create carved and etched patterns or logos that can also be illuminated for corporate branding. Staron® can be routed and used as signage. Use changing and coloured lighting for dynamic design. This creates an atmosphere that can be changed with the lighting colour to illuminate Staron®. This quality of Staron® pushes the boundary of design to new dimensions. You can create a unique design that will attract the eye, while being durable in nature.

building façade

Create entire building façades with Staron® Solid Surfaces. Staron® can be fabricated into virtually any desired shape to follow the angles of a building. The maintenance of the surface is also convenient and is renewable by simple cleaning or sanding. Staron® is also resistance to stain or environmental pollutants. It is non-porous and has a low rate of water absorption. Staron® is Class 1/A flame retardant in performance (ASTM E84) and can be restored in the event of a fire, through a sanding and polishing process. Additionally, Staron® can be routed, curved or backlit to create a façade that has design impact.

integrated sinks, basins & baby bath

When a Staron® benchtop is paired with a solid surface sink or vanity basin, a totally integrated sink space is created, with no open joins or dirt trapping crevices. The benchtop continues into your sink with a one-wipe flow. Due to the advanced joining capabilities of Staron® - the sink and benchspace looks, feels and performs as one single piece.

Staron® Environmental Sustainability

Staron® is non-toxic creating a safe environment for nature, people and animals. It has a **GREENGUARD** Certification which means that the product is safe for use in indoor spaces, meeting strict chemical emission limits, which contribute to the creation of healthier interiors. Staron® also meets the criteria for the more stringent **GREENGUARD GOLD** Certification which means that it is a safe product for use in environments for sensitive individuals such as children and the elderly, making Staron® acceptable for use in environments such as schools and healthcare facilities. The renewable and repairable nature of Staron® also extends its life span creating less need for waste. Staron® Surfaces has been awarded a SCS Material Content Certification by Scientific Certification Systems, a leader in certifying independent environmental claims. The certification recognises Staron® for the use of pre-consumer recycled materials in several of its surfacing colours. The certified colours that make the Recycled Collection are available on the Staron® website: staron.com.au

Staron® Simple Cleaning & Maintenance

Most dirt and stains are easily cleaned by using warm soapy water or an ammonia-based cleanser. For a deep clean, use a white Scotch-Brite® pad and a mild-abrasive cleanser such as Jif and clean in a circular motion. Complete the clean by wiping with a soft damp cloth. These steps will rejuvenate the surface, buff away fine scratches, and keep your Staron® surface looking fresh and clean for many years to come. Detailed information about caring for Staron® can be found at staron.com.au

Evermoin® by Staron® is an ideal surface solution for applications that are exposed to sensitive people and/or animals such as the sick, elderly or children. It provides the hygiene and design versatility of Staron®, with a bacteria killing, antibacterial inclusion. Standard Staron® supresses bacteria due to its non-porous nature, while Staron® Evermoin® **actively kills** bacteria. Evermoin® antimicrobial surfaces from Staron® can be used in almost any interior space. Imagine nurses workstations and wall cladding in a functional and renewable material that is durable as well as ultra-hygienic. Achieve the perfect blend of simplicity in design with an antimicrobial surface engineered for a healthier life. For more information about Staron® Evermoin® visit: staron.com.au

Staron® Evermoin® is certified by:

Staron® Warranty

Staron® Solid Surfaces offers the peace of mind with a **10 Year Warranty**. To view the Commercial and Residential Warranty, visit: staron.com.au

Staron® Design Awards

The Staron® Design Awards program is open to any designer, architect, developer, kitchen/bathroom designer, student or any other designer who has created a design project using Staron® Solid Surfaces. The Staron® Design Awards have been designed to create exposure for designers and architects using Staron® in outstanding applications. The program is open in three categories.

For terms and conditions, more information on the industry design judges, entry dates, prizes, and how to enter, visit the Staron® website at staron.com.au

AWARD CATEGORIES & PRIZES:

COMMERCIAL: Any commercial / industrial project. Can be any segment including but not limited to: food service, education, healthcare, retail, office, boating, public spaces, museums, exhibitions, art sculptures etc. Non residential projects only. Must be a completed and installed project.

Prize: \$2000 cash + marketing exposure

RESIDENTIAL: Any house / apartment project. Includes kitchens, bathrooms, living areas or any part of the house / apartment. Staron® can be used in any form or application in a residential environment. Must be a completed and installed project.

Prize: \$1000 cash + marketing exposure

CONCEPT: An idea or concept. Can be a unique product or design that has been drafted, or is still in design stage. The entry can be as simple as an idea, drawing or graphic. Submit photos or drawing sketches. Student entries welcome.

Prize: \$250 cash + marketing exposure

Staron® Design Award Winning design by: Maria Gavriel & Al Brennan, NOSUCHSTUDIOcollective. Sculptural perimeter signage made entirely from Staron® in colour: Bright White.

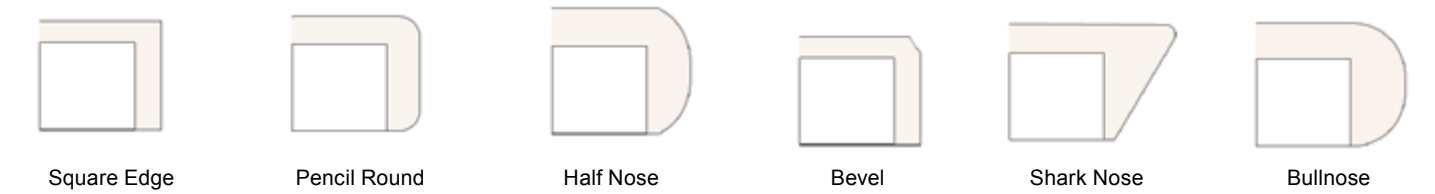

Staron® Sheet Sizes

The design versatility of Staron® means that limitless edge profile thicknesses and designs can be fabricated monolithically from a 12mm sheet. The joining capabilities also create smooth, wide and long surfaces with no open joins - just one continuous surface that looks and performs as one piece of solid surface.

SHEET DESCRIPTION	THICKNESS	LENGTH	WIDTH
Full Sheet 12mm	12mm	3680mm	760mm
Half Sheet 12mm	12mm	1840mm	760mm
930mm wide sheets in Bright White only	12mm	3680mm	930mm
6mm in Bright White, Quasar White & Pearl only	6mm	2500mm	760mm
6mm in Bright White only	6mm	3680mm	760mm
Full Sheet 19mm in Bright White, Quasar White & Pearl only	19mm	3680mm	760mm

Standard Staron® Edge Profiles

The following edge profiles are amongst the most popular. Staron® offers the design flexibility and freedom to create your own custom and personalised edge profile. Ask your Staron® supplier about more edge profile options available. Most benchtops in Staron® are a standard 38mm thick, however, the flexibility of Staron® means that any benchtop thickness can be created with minimal effort, and staying within your budget. Many other materials only offer a 20mm standard thickness.

Integrated Heat Rods

Fully integrated into Staron® - heat rods offer a place for hot pots and pans to rest. The rods also lift for easy cleaning.

Tile Cove & Splashback

A tile cove offers a smooth and clean finish at the back of your benchtop, where the benchtop meets the splashback. A 10mm tile cove will eliminate dirt and germ crevices and allow a smooth join to your splashback. Add a Staron® splashback for a seamless kitchen benchtop with no open joins.

Integrated Drainer

Fully integrated into the Staron® benchtop - a drainer can be fabricated next to your sink for a clean look that is easy to maintain.

Ask your Certified Staron® Fabricator about the design options available.

Aircharge® Wireless Charging Solutions

Create integrated charging stations directly into Staron® Solid Surfaces using **Aircharge®** wireless charging solutions. For more information about **Aircharge®** visit:
